

Governance, Risk, and Compliance Tool

As cyber-threats and regulatory mandates continue to expand, with the Apptega platform, organizations of all sizes are making it easy to assess, build, manage, maintain and report on their own security programs.

Build Great Cybersecurity

Assess and remediate risks within a living program. Confidently report in one click.

Pass Audits with Ease

Quickly achieve compliance for stakeholders and auditors faster than any other approach.

Manage Risk

Save money, simplify/automate processes and ensure you always have accurate, real-time insight into your evolving, complex risk landscape.

Simplify Vendor Management

Easily create, manage and send questionnaires to assess security levels of your vendors.

Maintain Your Program With Apptega

Keep your security program on track with Apptega—the all-in-one platform schools and local governments can use to manage cybersecurity after an assessment.

Instead of juggling spreadsheets, policies, and reports across different systems, Apptega keeps everything in one place: controls, tasks, policies, and progress tracking.

That means easier compliance, clearer visibility for leadership, and faster follow-through on action items. By using Apptega, you'll have a living security program that grows with your organization, ensures accountability, and makes it simple to show auditors and boards the progress you're making.

Apptega Audit Manager

Complete Audits with Ease

With the Apptega Audit Manager, easily manage your cybersecurity program—from Assessment to Audit.

Complete Audits Ahead of Time

Quickly complete auditor evidence requests faster than any other approach. Automatically link evidence from your compliance program to the audit.

Reduce Overhead

Use a single application that houses all compliance and audit data. Easily upload auditor evidence requests into the platform.

Improve Visibility

Visually track your audit progress with a Kanban-style board. Provide auditors with a filtered view—providing them only the data they need.

Increase Collaboration and Management Control

Alert internal stakeholders to provide updates and assign tasks directly to team members. Alert external auditors to review your evidence requests.
